

Hardware and Software Requirements for BYOT in 2018

Hardware Requirements

The minimum specifications for PRIMARY DEVICES:

- ❑ A laptop (NOT chromebook, iPad or similar)
- ❑ i5 processor or M5
- ❑ 4 GB RAM – (prefer 8GB)
- ❑ 256GB of storage(or 128GB with external drive or card)
- ❑ Sufficient battery life to last a school day

Basically, a machine capable of running Adobe suite – the most hardware-hungry software currently

Software Provided by the College

- Available Pre-installed on Datacom Machines
 - Windows 10 Edition (PC only)
 - Latest version of Microsoft Office
 - Other free software for which the College has appropriate licenses
- Available to download by all students (those purchasing from Datacom or independently) at no cost through IT Support
 - Adobe Creative Suite 6
 - Anti-Virus (Sophos)
 - Malware Bytes (free version)
 - SparkVue (Science)
- Other software may be required for specialised subjects which may incur a subject levy cost.
